The orator, after reviewing briefly the causes that brought about the war and the appropriateness and significance of the celebration, noticed the principal events in the conduct of the war and the difference in the military system of the two belligerents. He then gave his views upon the future of the re-united Empire, and of the character of North Carolina line, and only nine miles government that might be expected from the German people. He reviewed the history of the different efforts to bring about a united Fatherland, and how, by the aggressive war of Napoleon, the German States and people were welded into a union that promised strength and great usefulness.

As the demand for these articles increases, and the facilities for supplying them are greater, the business of the road will also increase. The products of the rich Powell's Valley find an outlet over this road, and merchants in the same locality receive their supplies over it. It is intended to be a part of a line that at some future time will connect us with Cincinnati and Louisville.

The Knoxville and Charleston road runs out from Knoxville to Maryville, the County site of Blount county, a distance of sixteen miles. Maryville is only nine miles from that celebrated summer resort, Montvale Springs. It passes through the Stock creek and Little river vallies, where large quantitles of corn, wheat, oats, potatoes and live stock are annually produced. This is a part of the contemplated Blue Ridge road, which, when completed, is to connect East Tennessee with the Sea-

Our principal river is the Tennessee. It and its tributaries traverse nearly all the counties in East Tennessee. It takes its name at the confluence of the Holston and Little Tennessee rivers, near Lenoir's sta-tion, twenty miles west of Knoxville, on the East Tennessee Virginia and Georgia Railroad, Steamers of from 180 to 200 tons burthen ply the rivers as far as Knoxville, H year. The Hiwassee, another tributary of the Tennessee, is crossed at Charleston by the East Tennessee, Virginia and Georgia railroad, its mouth being a few miles below. Steamers frequently run up to that point, and numerous flatboats, laden with the products of the country,

come down from above, We will add, that on all the above rivers ogether with numerous smaller streams, there are almost numberless sites for mills and other manufactories to be driven by water power.

Thus we have presented in as perfect a manner as our space will permit, the various mediums of transportation to which our people have access. The Tennessee river can, and, we have no doubt, will be made navigable for steamers as far East as Knoxville the entire year. If this were done it would add very materially to our facilities for cheap transportation. This

Beverly, Mass., July 18, 1869.

Dr. Radway—I have had Ovarian Tumer in the ovaries and bowels. All the doctors said "there was no help for it." I tried everything that was recommended, but nothing helped me. I saw your Resolvent, and thought I would try it, but had no faith in it, because I had suffered for twelve years. I took six bottles of the Resolvent, one box of Radways Pills, and used two bottles of your Ready Relief; and there is not a sign of a Tumor to be seen or felt, and I feel better, smarter and happier than I have for twelve years. The worst Tumor was in the left side of the bowels, over the groin. I write this to you for the benefit of others. You can publish it if you choose. **
